Faiz Ichsan Jaya

Frontend Developer & UI Designer

✺

I'm a front-end developer with a keen interest in design. I specialize in creating user-friendly, visually appealing, and highly functional web applications.

Work Experience

SoftwareSeni
Jun 2020 - Present

Front End Developer, Full-time

- Build the client-side code for polished web applications using HTML, CSS/SCSS, PHP, and JavaScript (primarily WordPress and hybrid websites)
- Manage the development and maintenance of applications, ensuring that they function smoothly and meet the needs of clients
- Provide technical support and guidance to team members, contributing to the efficient resolution of issues and smooth operation of projects

Self-employed
Mar 2016 - Present

Web Developer, Freelance

- Design and build layouts using HTML, CSS, JavaScript, and Tumblr-specific blocks and variables
- Assist clients in designing their website on Figma, resulting in a visually appealing and effective design
- Use provided briefs to guide the design process, ensuring that the final product meets the client's needs and specifications
- Perform maintenance and provide support to clients

G-MOOC
Mar 2019 - Aug 2019

Frontend Developer & UI Designer, Contract

- Designed and built raw HTML, JavaScript (JS) and CSS
- Designed and implemented UI/UX for a website to ensure that the visual front end is free of errors and looks exactly as intended
- Made sure the website is responsive and mobile-friendly, including creating separate mobile-specific designs.

Selected Works

FUKUO (Tumblr Development & Web Design)

Side project
2012 - Present

I offer free & premium **tumblr** themes for public use, and occasionally share tutorials and resources for Tumblr theme development.

GMOOC (Gamified Massive Open Courses)

E-learning platform
2019

An open online course platform using a gamification approach. Gamification provides an opportunity for the learner to master the available quests interestingly and interactively.

Education

Universitas Amikom Purwokerto
2016 - 2020

Bachelor of Computer Science
GPA 3.77 (out of 4.00)

Specialities

HTML, CSS, JavaScript, jQuery, Vue, (Nuxt), Visual Design, Prototyping, Wireframing

Tools

Figma, Adobe Photoshop, Git, Notion, Google Docs

Honors & Awards

Hackfest 2018 (Universitas Atma Jaya Yogyakarta) - Top 10 Finalist

Involved in front-end development, building a website from scratch using HTML, CSS and JavaScript
