Faiz Ichsan Jaya

Frontend Developer & UI Designer

Work Experience

SoftwareSeni

Front End Developer, Full-time   June 2020 → Present

- Responsible for the AgentPoint+ core of a widely used WordPress real estate plugin and themes, focusing on the **WordPress Gutenberg** development project.
- Build the client-side code for polished web applications using HTML, CSS/SCSS, PHP, and JavaScript (primarily WordPress)

Technologies: HTML5, SCSS, React, TypeScript, JavaScript, PHP (Laravel), WordPress

Self-employed

Web Developer, Freelance   March 2016 → Present

- Design and build layouts using HTML, CSS, JavaScript, and Tumblr-specific blocks and variables
- Use provided briefs to guide the design process, ensuring that the final product meets the client's needs and specifications
- Perform maintenance and provide support to clients

Technologies: HTML, CSS/SCSS, JavaScript, **tumblr**

G-MOOC

Frontend Developer, Contract   March 2019 → August 2019

GMOOC (Gamified Massive Open Courses) is an open online course platform using a gamification approach which provides an opportunity for the learner to master the available quests interactively.

- Designed and built raw HTML, JavaScript (JS) and CSS
- Designed and implemented UI/UX for a website to ensure that the visual front end is free of errors and looks exactly as intended

Technologies: HTML, CSS/SCSS, JS, PHP (CodeIgniter), Vue
