

Career Summary

5+ years building user-friendly web applications as a Frontend Developer & UI Designer. Specializing in React, TypeScript, WordPress, and Figma-to-code workflows.

Key Capabilities:

- **Frontend Development** — React, TypeScript, and WordPress apps from initial setup to production deployment.
- **UI/UX Design** — Figma-first workflow, bridging design and code with pixel-perfect implementation.
- **WordPress & Gutenberg** — Custom plugins, themes, and Gutenberg blocks for real estate and web platforms.
- **Freelance & Client Work** — End-to-end project delivery, from client brief to launch and ongoing support.

Work Experience

SoftwareSeni (Reapit)

Frontend Developer, Full-time (June 2020 → Present)

- Contribute to AgentPoint+, a WordPress real estate plugin and theme suite **used by agencies across Australia and New Zealand**.
- Build client-side features ensuring pixel-perfect, cross-browser compatible implementations.
- Collaborate with design and product teams to deliver UI/UX improvements across the platform.

Technologies: HTML5, SCSS, React, TypeScript, JavaScript, PHP (Laravel), WordPress

Key Achievements:

- Build **40+ Gutenberg blocks** across **3 WordPress themes**, powering a drag-and-drop listing builder used by **200+ real estate agencies**
- Eliminate dev bottleneck for standard listing page customization, enabling agency self-serve
- Techie of the Year 2024, Reapit

Self-employed

Web Developer & UI Designer, Freelance (March 2016 → March 2025)

- Designed and built websites for **100+ clients**, translating briefs into polished, functional web products across various industries.
- Managed projects end-to-end from brief to delivery with ongoing support and maintenance.

Technologies: HTML, CSS/SCSS, JavaScript, Tumblr, Figma

G-MOOC (Gamified Massive Open Courses)

Frontend Developer, Contract (March 2019 → August 2019)

- Designed and built raw HTML, JavaScript (JS) and CSS
- Designed and implemented UI/UX for a website to ensure that the visual front end is free of errors and looks exactly as intended

Technologies: HTML, CSS/SCSS, JS, PHP (Codelgniter), Vue

Education

Universitas Amikom Purwokerto

2016 → 2020

Bachelor of Informatics Engineering

GPA 3.77 (out of 4.00)

Specialities

HTML, CSS, JavaScript, PHP, React, WordPress, Visual Design, User Interface Design, Wireframing, Prototyping

Tools

Figma, Adobe Creative Suite, Notion, Jira, Google Docs, Git, Visual Studio Code

Languages

Indonesian (Native or bilingual proficiency)
English (Professional working proficiency)

Projects

FUKUO (Tumblr Development & Web Design)

Side project (2012 → Present)

I offer free & premium Tumblr themes for public use, with **100,000+ installations** since debut. Occasionally share tutorials and resources for Tumblr theme development.
